Announcements 2/2

- next IML meeting
Friday 26 Jan 2018, 222-R-001 (Filtration plant)
open topic, aiming for:
 - followup on today's meeting
 - news/summary from NIPS
 - tools and software updates
 - <your project here>

2018 IML workshop

- plans getting more and more concrete
“core workshop” 9th April – 11th April
✓ rooms booked
- similar to last time: physics sessions
topics: deep learning (tagging, regression, generative models)
- new: hackathon 12th April (one day)
bring on your project (e.g. new feature for your favourite ML tool)
profit from expertise of the other participants around you
join and help others on their project
→ suggest problems to attack at the hackathon
- different than last time: challenge
will start before the workshop (to run \sim one month)
more details in 2018

today's topic: common benchmark dataset

what we want:

- ML benchmark(s)
- HEP specific
- common among experiments
- → able to compare two methods by looking up their benchmark

today's focus: technical challenges

- make data accessible
- size, formats, ...
- citing data
